

Facilities

The school is very fortunate in having some excellent facilities to enhance the learning and well being of students at our school.

Taking pride of place among our facilities is a large covered area obtained through the work of some very dedicated P and C members. The covered area is large enough so that a large number of our students can enjoy play time regardless of the weather. It can also be used during Phys Ed lessons if the weather is too hot or too wet. The covered area is attached to our main school building and our Prep/Year 1 building by covered walk ways. The run off from the roof is also used to fill up our water tanks which are used to flush our toilets making us independent of town water supply in this area.
